After 30 years of gaining knowledge and experience, the Jahan Mark Company was established in 1990 and set up at a small workshop. Initially, it began to work only in the field of plaque production and identification labels.

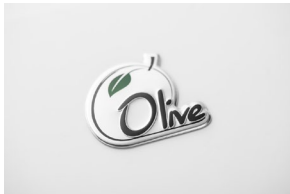

Then, in 1994, it succeeded in launching the polycarbonate labels production line, then the workshop moved to a larger location and more advanced devices were installed in it.

Logging digital design and produce high-quality products made it more satisfying to customers.

In 1999, R&D section in Jahan Mark was able to install the Label Coating System for the first time in Iran with the co-operation DEMAK Italy company that it bought four machines from this company until now. In the years 2008-2012, they stepped up the development of day-to-day technologies for the creation of logos and product nameplates.

The entry of micromolding devices from Korea, Germany and Hong Kong has led to a zero-to-hundred production in the Jahan Mark complex.

And to this day, Jahan Mark family has been working to develop powerful day technologies.
